. I need to grep the "Overview: " part out of the "kk-". Any suggestions? A: A possible solution with awk: `awk '/Summary/{print $2}' file.txt`

From the man page of awk: If a pattern occurs more than once within a single input line, ^{^^^^^^} here the pattern is matched for all occurrences of this command line. The pattern is first checked for validity and then the entire input line is matched to the above condition. The ACTION statement is executed if the condition is true. The default action is to print the pattern string. If the condition is false, the default action is to print the input line. If the pattern does not occur in the first line, you have to add a clause to print the line if this is the first line: `awk '/Summary/{print $2} !/^\\s\\s/' file.txt` If you want to match only the words "Overview:" or "Chapter 1: ", you can use a combination of `match()` with the IGN 3da54e8ca3
