When I studied the ELAU EPAS-4 servo software, I found it to be a good software, ... I have a project made in EPAS-4_V22, but I can't open it because I forgot. .. <https://github.com/nagizumov/epas4> I had the ELAU EPAS-4 software that I bought from another manufacturer a year ago and didn't know how to use it. But here is my problem: I have a servo device that I can use but I bought in this other software and can't open. If anyone knows how to do this please help me I believe that you are trying to open a driver written by the person who sells this driver.
