Famous screensaver describes a list of famous names that fall down the screen. When a text you define in the rich text area becomes visible, it is selected for deletion. The task is to quickly delete everything that does not correspond to your definition. So, now you will try the Famous screensaver. This screensaver is impressive because you can add texts and define a list of different names for deletion. But I am also happy if I can add one simple word to the Famous Free Screensaver or to the Famous Screensaver List, i.e. a word that I have added to the Famous Free Screensaver list. That is the reason that I have added "Famous Free Screensaver" to this list. So, to get more information and report an error, please read the description of the Famous Free Screensaver, which you can find here. My Favorite: The Famous Screensaver is my Favorite! I added the Famous Free Screensaver to this list, because the Famous Free Screensaver is an outstanding screensaver with integrated word definitions and automatic name selection. So my best suggestion is: Download the Famous Free Screensaver! Important: The Famous Free Screensaver cannot be downloaded as a part of the Screensaver Pack 1.0, because it is a screensaver without text definitions and without automatic name selection. So please download the Famous Free Screensaver from the web page "Downloads" on the main page of the Famous Free Screensaver. The same version number of the Famous Free Screensaver is available as the Famous Screensaver 1.0. Why do I recommend the Famous Free Screensaver: Because this screensaver is not only impressive, but also free to download and use. You can use the Famous Free Screensaver without any disadvantages because it is 100% freeware. How to use the Famous Free Screensaver: Click on the text you want to define, then press the right mouse button and select "Delete Text!".
