This new feature will set fans and players' expectations for life-like gameplay – animations will be locked and players will need to perform at the physical level of the real-world human players to succeed in a match. This is achieved through the new 'HyperMotion' technology. FIFA 22 introduces "The FIFA Experience," a suite of gameplay enhancements that aim to make the game more accessible and engaging for all ages and skill levels. In FIFA 22, you can now customize the exact playing style of your favorite teams. Since we know that every club has its own traditions and that players prefer to play in one way or another, we took the time to fine-tune FIFA's underlying engine to ensure that players will have the chance to play in their favorite style. To make the game more appealing for players of different skill levels, we have also redesigned FIFA's scouting system to increase the range of players that can be found and to make the match-ups more enticing. FIFA 22 introduces a new matchmaker mode that allows players to play friendlies on any team they like. The game can be played through a classic draft or a board-style selection process. Our goal is to bring the fun back to FIFA by highlighting the experiences of a particular time in history. In FIFA 2K14, we made several improvements to historical leagues: the game showed all matchdays and managed in real time to ensure that historical matchdays did not display a league table or schedule. At the same time, we added the option to play each matchday with a specific starting squad. This last feature included a new Challenge Matchday mode and League Challenges that can be won in the mode. Now, with FIFA 22, we are taking the concept even further to make a game that focuses completely on the legendary matches from the past. We have taken inspiration from several sources – from the concepts of classic games to specific events, clubs and players that lived these golden moments in football. We will highlight some of these moments through the history of the clubs involved. Thanks to "The FIFA Experience", players can choose a team they like and play a competitive game with this squad. For each league, we added the following elements: Challenge Matches: teams can now invite a challenger to defeat them. Matchday Goals: a new way to compete with your friends. Players can complete challenges for fun in order to get the most trophies and points

FIFA is a series of association football video games produced by Electronic Arts and published by EA Sports. Since the first FIFA video game in August 1992, the series has developed the sports video game genre and introduced innovations that have shaped the sports video game industry. FIFA Soccer, the series' first title, introduced and popularized a team-based, cartoon-style presentation and individual skill gaming. It was released in late September of 1994 and pioneered several gameplay concepts, including on-pitch substitutions, the use of the shoulder, and an extra measure of player individuality. It went on to sell one million copies in its first month of release. In 1999, FIFA 99 introduced licensed teams and stadiums, with nearly 1,000 licensed player names and more than 400 crowd sounds. The year 2000 brought licensed team kits, award-winning innovations in roster management and the creation of the game's first official league, the FIFA Club World Championship. In 2002, FIFA Street broke down the fourth wall and provided a more in-depth experience. That same year, FIFA Football (aka EA Sports FIFA) introduced the first FIFA World Cup tournament, for which EA Sports has been responsible since then. In 2004, FIFA Soccer Club was introduced. In 2006, EA Sports introduced a revised version of the game called FIFA 06, which featured improved graphics, a revised and improved handling system, and breakthrough gameplay technology. Also in 2006, the FIFA Interactive World Cup was introduced, kicking off a new era of fan interaction, the widespread use of "fan votes" and the start of a fully-integrated tournaments feature. FIFA 07 represented the largest leap forward in the series as a whole. The game was the first to incorporate a fully three-dimensional 'three-voxel' representation of players. In 2007, a revised version of the game was introduced, FIFA 08. The game featured many innovations such as the first-ever game with exaggerated (bulging) players, a new ball physics system, reaction and balance improvements and much more. A new audience-interaction system, rewards and a huge, new feature set, World Class Team (WCT) were introduced. "FIFA World Cup 2014" was released on September 10th, 2014, in North America and September 15th, 2014, in Europe. It features 46 licensed national teams and over 15,000 licensed player names. New to FIFA World Cup 2014 are in-game crowd experiences,
