Sonic Education Music School I have decided to mention this one first since it is among the oldest online music schools in the market today. It was established in 2004 and has been helping students, children and adults to learn the art of music all over the world for over ten years now. The application is not specifically designed for children or adults, although it comes with various templates that are suitable for both categories of users. In other words, while you have simple and patterns, such as flowers, animals or fruits, for instance, you can also try to color more advanced drawings that involve Mandalas. In case you decide to opt for the second option, then you should know that the utility comes with a zoom function that enables you to view the small patterns more clearly and fill them accordingly. Therefore, you do not have to put an extra strain on your eyes just to finish abstract drawings. Allows you to create your own colors It is worth mentioning that the application includes a wide selection of colors specific to Windows 10 that you can select from a dedicated panel. Then again, if you are unable to find the hue or palette you need, then the tool allows you to create a new color by mixing the existing ones. Once you are satisfied with your work, you can save it in a JPEG file format, but it would have been nice if the app supported other formats as well. Moreover, it would have been useful if the program supported hotkeys for the Undo function, as you are likely to change your mind while coloring.
